

Welcome aboard your Airline Pilot journey with Alpha Aviation Academy!

- Alpha Aviation Academy (AAA) is managed by, and in partnership with, Air Arabia.
- The Academy uses state-of-the-art training equipment and technologies for training all cadet pilots by highly experienced and qualified instructors.
- We use training facilities in the region and flight training capability in Europe, Australia and Asia to facilitate the best for our cadets.
- Our unique programme offers airline quality training starting from instilling an airline mindset at the onset of classroom lectures and incorporating airline practices early in the basic flight training to meeting global airline standards in the Airbus A320 training phase.
- Alpha is currently one of the region's largest Multi-crew Pilot License (MPL) providers with over 200 MPL cadets under training and over 400 graduates currently flying with multiple international airlines.
- Our instructors focus on building the skills, knowledge and attitude of cadets during all phases of the programme as a strategy to not only fulfill but surpass the future Airline Pilot requirements.
- We provide relevant, timely and world-class training programmes to ensure that each cadet achieves a qualification that is in demand within the industry.
- Our management strives to bring the 'comforts of home' to the campus, ensuring that cadets feel safe, secure, inspired and motivated.

Multi-Crew Pilot Licence (MPL) is an airline-dedicated professional pilot license programme with specific airline and aircraft training syllabus.

Alpha Aviation Academy (AAA) UAE located at Sharjah International Airport is the world's second largest provider of MPL programme, which is the core requirement of all airline companies.

Cadets to Pilots' Journey through AAA's Course Structure

In order to obtain the Multi-Crew Pilot License, the programme has been planned for 20-24 months period, in the following order:

- **Ground School** – Theoretical Knowledge classes of 14 ATPL subjects, based on EASA standards;
- **Flying Phase** – Core Flying of 70 hours on a single engine aircraft;
- **Basic Phase** – Fixed Simulator – Transition from single pilot to Multi-Crew Cooperation;
- **Intermediate Phase** – Application of Multi-Crew operations to a multi-engine turbine airplane conducted on Airbus A320 simulator.
- **Advanced Phase** – Hours on Airbus A320 full flight simulator and Type Rating;
- **Base Training** – Several take-offs and landings on Airbus A320 aircraft.

Upon the successful completion of the programme, the cadet will obtain the MPL and continue with Air Arabia for the following phase of training:

- **Line Training** – required number of flights for training and building up
- 1500 hours on Airbus A320 Aircraft.

Upon the successful completion of the 1500 flying hours, the cadet will receive an **Airline Transport Pilot License**.
